Full Stack Developer specializing in MERN stack development with strong expertise in building secure and scalable applications. Experienced in collaborating within Agile development teams, contributing to user-centric solutions with a focus on performance and security. Dedicated to leveraging technical skills to create innovative, high-impact solutions. Seeking to leverage technical excellence to contribute to a dynamic organization and drive meaningful results.

Skills

Frontend: HTML, CSS, JavaScript (ES6+), React, Bootstrap, Tailwind

Backend: Node.js, Express, REST APIs

Databases: MySQL, MongoDB

Tools: AWS (EC2, S3, DynamoDB), Git, Vite

Projects

AdminAccess adminaccess-f697b23e85fa.herokuapp.com | github.com/kyoriku/AdminAccess

- Engineered MySQL database and Express API endpoints for managing employee, role, and department data
- Built secure authentication system with session-based user management for admin access
- Developed React-based admin dashboard with real-time updates and confirmation dialogs

Technologies: JavaScript, React, Node.js, Express, MySQL

CloudShare github.com/kyoriku/CloudShare

- Architected cloud-native social platform utilizing AWS DynamoDB for data persistence and real-time updates
- Implemented secure image upload system with AWS S3 bucket configuration and access control
- Developed scalable backend architecture with Node.js/Express API endpoints and EC2 deployment

Technologies: JavaScript, React, Node.js, Express, AWS (EC2, S3, DynamoDB)

RendezView rendezviews-6983bdd1f9ce.herokuapp.com | github.com/kyoriku/RendezView

- Architected event management platform with Node.js backend and MySQL database for user and event data
- Implemented OpenStreetMap integration for dynamic venue location and mapping features
- Designed user dashboard system for managing event creation, RSVPs, and attendance tracking

Technologies: JavaScript, Node.js, Express, MySQL, Handlebars

Education

University of Toronto – Certification, Full Stack Web Development

March 2024

Experience

Grill Cook, Eastbound Brewing Company – Toronto, ON

October 2018 – Present

- Engineered web-based inventory tracking application to streamline kitchen operations and reduce waste
- Managed high-volume grill operations while maintaining quality standards during peak service periods
- Established standardized cooking procedures to optimize order preparation and delivery times

Warehouse Crew Leader, Young Guns – Vancouver, BC

May 2021 – May 2022

- Supervised 4-person container crew teams coordinating unloading operations and inventory management
- Established digital tracking system to maintain accurate records of container contents and locations
- Implemented structured team rotation schedule to optimize productivity and reduce worker fatigue
