Summary

Junior Full Stack Web Developer with expertise in the MERN (MongoDB, Express.js, React, Node.js) stack and a proven track record in building user-centric applications. Experienced in Agile methodologies and collaborative development, with strong problem-solving skills and attention to detail. Seeking to leverage technical skills and leadership experience to drive impactful outcomes.

Technical Skills

- **Languages:** HTML, CSS, JavaScript, SQL
- **Libraries/Frameworks:** jQuery, React, Node.js, Express.js, Bootstrap
- **Databases & ORM:** MySQL, MongoDB, Sequelize, Mongoose
- **APIs:** REST, GraphQL
- **Tools:** Git, Jest, Nginx, npm, Webpack
- **Cloud Services:** AWS (S3, DynamoDB, EC2)
- **Methodologies:** Agile, Scrum

Projects

AdminAccess | [GitHub](#) | [Live Demo](#)

Employee data management solution using the MERN stack, featuring secure authentication and an intuitive admin interface.

- Developed front-end and back-end components, including a secure login form.
- Implemented CRUD functionality for departments, roles, employees, and managers.
- Enhanced user interface interactions for improved usability and responsiveness.
- Utilized Agile methodologies to manage project timelines and team collaboration.
- Led a team of 3 developers, overcoming challenges in data security by implementing robust encryption methods using Bcrypt.

Technologies: JavaScript, React, Node.js, Express.js, MySQL, Sequelize, Bootstrap

RendezView | [GitHub](#) | [Live Demo](#)

Event planner web application enabling users to browse, create, edit, and delete events, fostering community engagement.

- Integrated user authentication and databases.
- Executed full-stack development with CRUD functionality for events.
- Optimized database queries for efficient data retrieval as the lead back-end developer.
- Utilized Google Maps API for location services and ensured responsive design for optimal user experience.

Technologies: HTML, CSS, Bootstrap, JavaScript, jQuery, Node.js, Express.js, MySQL, Sequelize, Handlebars, Google Maps API

FilmFinder | [GitHub](#) | [Live Demo](#)

Movie database application allowing users to search, view details, and maintain a personalized watchlist of movies.

- Utilized JavaScript/jQuery for dynamic functionalities.
- Integrated APIs to implement a watchlist feature using local storage.
- Addressed rate limiting issues by optimizing API request handling.
- Developed front-end features including UI/UX design, search functionality, and movie cards, with a focus on responsive design.

Technologies: HTML, CSS, Bootstrap, JavaScript, jQuery, The Movie Database API, Watchmode API

Experience

Grill Cook | Eastbound Brewing Company, Toronto, ON | October 2018 - Present

- Delivered high-quality dishes, maintaining a 4.5/5 customer rating.
- Streamlined kitchen operations, reducing order prep time by 15%.
- Optimized inventory, cutting costs and waste by 20% with FIFO system.
- Developed a web app for inventory tracking, reducing discrepancies by 30%.

Warehouse Crew Leader | Young Guns, Vancouver, BC | May 2021 - May 2022

- Managed logistics for loading/unloading, improving turnaround by 20%.
- Assigned teams and recorded data, increasing productivity by 15%.
- Ensured safe handling of freight, maintaining a zero-incident record.
- Implemented a team rotation system, reducing fatigue and sick days by 10%.
